KILANG SAWIT LCSB LEPAR As a company with large-scale plantation areas, the need to have an oil palm mill to process the FFB is seen as an important investment for the company. Kilang Sawit Lepar Oil Palm Mill, located in Lepar, Pekan, was built in 1995 and started operation in 1997. This factory is capable in processing as much as 40-80 tons of FFB (fresh fruit bunches) per hour.

KILANG SAWIT DOMINION SQUARE SDN. BHD

A new oil palm mill plant was also built in 2000 in a 21 hectares site in Ladang Sri Meranti, Kuantan where it began operation in 2003. The mill is able to process as much as 40-80 tons of FFB per hour. Managed by subsidiary company of LCSB via Dominion Square Sdn Bhd, this factory is to accommodate the increasing quantity of FFB and also to deal with new FFB supplies from the opening of new estates by the LKPP group and external suppliers.

Quality Management System (SPK) of Dominion Square Sdn Bhd was established based on MS ISO 9001:2000 which cover aspects such as Obtainment and Processing of Palm Fruits to produce crude palm oil and palm kernel. This system is important in order to guarantee products that have good quality and falls within the industry standards before being sold and dispatched to the purchasers.
